Shakeel Qazi is the Chief Information Officer (CIO) of the Department of Animal Care and Control (DACC). In his role, he oversees all aspects of information technology, information security, data and analytics, system implementation, mobility, and the growth and maintenance of the technology infrastructure for the DACC.

Prior to his role as a CIO, Qazi served as a section manager of Information technology for the Department of Social Services where he managed computing application systems supporting electronic records and content management. Qazi also oversaw the infrastructure, cloud services and on-going support and maintenance of over 30,000 endpoint network devices.

Qazi is an experienced leader in the public sector Information technology community with more than 20 years of experience in business process improvement, information technology strategy, and implementations.

Qazi received his Master of Business Administration in Information Systems at the Kennesaw State University of Georgia.

In his spare time, he enjoys exercising, playing sports, traveling, and spending time with friends and family.
